

## Modifying Trim Lines of an OBSS Digitized Image

*Changing the Parting Angle (location of juncture between seat and back) of Your Cushions*

1. Click the “Right Side” view or “Left Side” view icon located above the digitized image in order to view the cushion from one side or the other. (Fig.1)
2. Click on the “Edit Cushion” pull down menu and scroll down to “Modify Trim Points”; click on the “Modify Trim Points” option. You should now see yellow boxes located at strategic points on the green trim lines. (Fig.2)

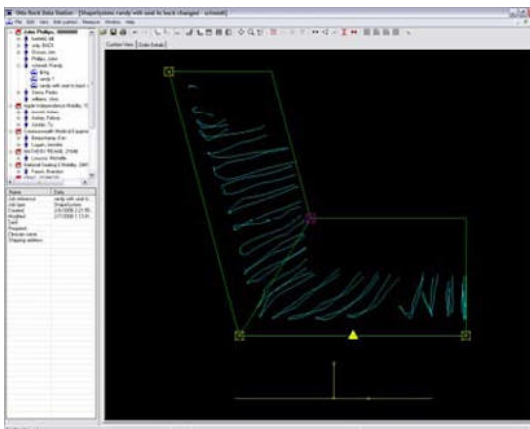

(Fig. 1)

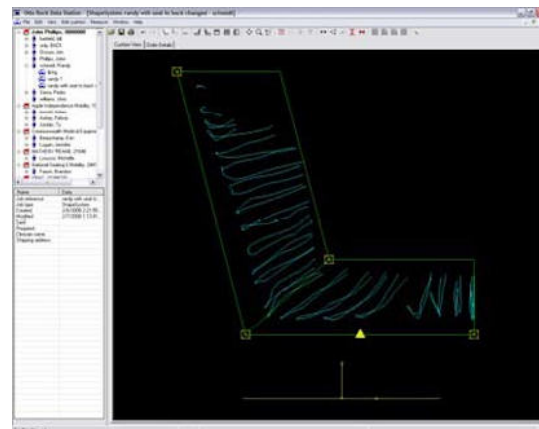

(Fig. 2)

3. Using your mouse cursor, left mouse click on the yellow box located at the appropriate intersection of the seat and back trim lines. The yellow box will now change to a pink box. (Fig.3)
4. Place the mouse cursor at the desired location for your new parting angle, and left mouse click once. The pink box will move to the location of your mouse cursor and relocate the green trim lines accordingly, and the pink box will change back to yellow. (Fig.4)

(Fig. 3)

(Fig. 4)

5. Click on the "Edit Cushion" pull down menu and scroll down to "Modify Trim Points"; click on the "Modify Trim Points" option to turn the feature off and hide the yellow boxes. Your new parting angle location will now be displayed.
6. For more modifications of the same angle, repeat steps 1 through 5.
