Thousands of satisfied users can't be wrong:

No microprocessor knee prosthesis has been the subject of as many scientific studies as the C-Leg. Among other things, the results of the C-Leg studies prove that:

- The frequency of user falls can be reduced by about 64%.
- Around 90% of users feel demonstrably safer with the C-Leg than with a mechanical prosthesis.

More than 75,000 fittings make the C-Leg the most preferred prosthesis among above-knee amputees around the globe. For good reason. The world’s most successful knee prosthesis has many benefits.

The C-Leg 4 is a mechatronic knee prosthesis with the ability to dynamically adapt to your respective movement situation.

The C-Leg 4 owes its "intelligence" to its technically sophisticated elements based on many years of research. The C-Leg joint independently determines your current gait phase and responds according to the situation. Benefits for you from this technology include:

- A harmonious, inconspicuous gait pattern
- Significant protection against tripping and falling – proven by studies*
- Safe walking on even and uneven surfaces
- Proven safe backward walking
- Walking down stairs naturally, step-over-step
- Relaxed standing with the joint slightly flexed and intuitive control
- Two additional modes that can be preconfigured for your preferred work, leisure, and everyday life activities
- Can be controlled via your Android or iOS device using the Cockpit™ app**
- Undivided attention for your surroundings and less concentration on the prosthesis

**iOS compatibility is available only with the new C-Leg 4. iOS compatibility is not available with previous versions of the C-Leg 4.

Do you want to continue leading an active and independent life after an above-knee amputation? The C-Leg 4 can provide you with optimum support in numerous everyday and recreational activities. Suitable for people with a moderate to higher activity level, the C-Leg 4 could enrich your life as well.

Your prosthetist will be happy to discuss the prerequisites for wearing a C-Leg.

- Benefit from the recently revised C-Leg 4 functions and take advantage of the option to conveniently control the joint with your smartphone. The new C-Leg 4 is compatible with Android and Apple iOS devices.
- Ask about a trial fitting for a realistic impression of the benefits offered by the world’s most commonly worn microprocessor knee joint.
- Find out whether the C-Leg 4 can become your everyday companion, too.
