Clinical Studies

1. Herr H., Grabowski A. (2012): Bionic ankle-foot prosthesis normalizes walking gait for persons with leg amputation, Proc Biol Sci. Vol. 7, 279(1728): 457–464.
2. Ferris A., Aldridge J., Sturdy J., Wilken J. (2011): Evaluation of the Biomimetic Properties of a New Powered Ankle-Foot Prosthetic System, Dept. of Orthopedics and Rehabilitation, Center for the Intrepid, Brooke Army Medical Center, Fort Sam Houston, TX, USA. Presented at American Society of Biomechanics.
3. Gates D., Aldridge J., Wilken J. (2013): Kinematic comparison of walking on uneven ground using powered and unpowered prostheses, Clinical Biomechanics, 28, 467–472.
4. Aldridge J., Ferris F., Sturdy J., Wilken J. (2012): Stair ascent Kinematics and Kinetics with a Powered Lower Leg System Following Transtibial Amputation, Gait & Posture, Vol. 36, 291–295.
5. Grabowski A., D'Andrea S. (2013): Effects of a powered ankle-foot prosthesis on kinetic loading of the unaffected leg during level-ground walking, Neuroeng Rehabil., 10:49.
6. Esposito E., et al. (2015): Step-to-step transition work during level and inclined walking using passive and powered ankle-foot prostheses, Prosthet Orthot Int.
7. Kannenberg A., et al. (2020-in peer review process): Impact of a powered prosthetic ankle-foot component on musculoskeletal pain in individuals with transtibial amputation: A cross-sectional study with concurrent and recalled pain and functional ratings.
