Triton® smart ankle

Reclaim your choice.

“I think the Triton smart ankle helps me reclaim my daily life. It does the thinking for you, and you can go about your daily life”

Shelby, Triton smart ankle user

Reclaim your choice with Triton smart ankle. Your choice for adjustable heel height to open up your footwear options. Your choice for a longer battery life to keep up with a busy life. Your choice for more range of motion to **help keep you moving.**

Reclaim your choice.

- Adjustable heel height
- Greater range of motion
- Longer battery life
- Control in the palm of your hand (App)

App puts control in your hand

You can quickly and easily make changes to how your foot moves and functions with a convenient app (available for Apple and Android devices). This free download gives you control to alter the heel height for different shoes, adjust the foot angle making it easier to put on or take off pants and other clothing, monitor battery life, lock your foot in a certain position for different activities, and other features.

Adjustable heel height

Triton smart ankle will accommodate shoes with up to 2 inches of heel height. This gives you the versatility to switch between different shoes more easily and conveniently.

More range of motion

You can relax knowing that Triton smart ankle has more range of ankle motion than any other microprocessor-controlled ankle¹. For you, that means more flexibility, more stability, and a more natural appearance when sitting or standing.

Longer battery life

With up to 3 days of battery life, Triton smart ankle lasts longer so you don't have to worry about whether the foot can keep up with you. You can monitor the foot's battery life via the convenient app so you always know its battery level.
